DETAILED ACTION

Allowable Subject Matter

1. Claims 52-74 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest an in-line apparatus capable of creating an EMI shield, the apparatus comprising: a conveyor assembly capable of moving a substrate from a first station to a second station and to a third station; a vacuum shaping assembly disposed at the first station, the vacuum shaping assembly comprising a vacuum source that pulls the substrate against a surface of a mold to shape the substrate into an EMI shield body; a metallization assembly at the second station that can create a seal around the shaped substrate, wherein the metallization the metallization assembly deposits a metal layer onto the shaped substrate; and a cutting assembly disposed at the third station to cut the shaped substrate, the cutting assembly being movable relative to the shaped substrate. **The apparatus further characterized by the conveyor assembly positioning at least a portion of the substrate along a plane, wherein the shaping assembly , metallization assembly and cutting assembly are movable orthogonal to the plane of the substrate OR characterized by the vacuum shaping assembly comprising a first portion disposed on a first side of the substrate and a second portion disposed on a second side of the substrate.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Washburn discloses an inline apparatus similar to the one claimed. However, Washburn fail to teach a *vacuum* shaping assembly or each of the shaping assembly, metallization assembly and cutting assembly movable orthogonal to the plane of the substrate.
